DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p.5-8 of the remarks filed on September 13, 2004, with respect to newly amended claim 1 (and its dependent claims 2 and 3), and claims 4-12 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.
2. The examiner has withdrawn the rejection of newly amended claim 1 (and its dependent claims 2 and 3), and claims 4-12 since the applicant has pointed out that the gate electrode is disposed over the gate oxide and the two separate isolation oxide regions.

Allowable Subject Matter

3. Claims 1-12 are allowed.
4. The following is an examiner's statement of reasons for allowance: the examiner is unaware of an insulated capacitor test structure having a gate electrode which overlaps two separate isolation oxide regions and a gate oxide while having the same conductivity type (but at a higher concentration) as the substrate.
5. Bush et al. (USPN 6,469,316 B1) discloses a test structure which is used to detect counterdoping. However Bush does not disclose the applicant's specified structure such that the gate electrode overlaps the gate oxide and two

separate isolation oxide regions. Thus Bush does not disclose the applicant's device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
